**HELPING YOU TO SAVE ON THE ROUTINE
CARE OF YOUR HORSE**

Weight Problems?

It's not just your own weight you need to keep an eye on!

If you are interested in checking that your horse is at a healthy weight, please give us a call to arrange to use our weigh bridge - FREE OF CHARGE. At that time one of our nurses can discuss your horse's diet with you.

Endells on the Road

We have a huge amount of portable equipment at Endells. We have state of the art mobile digital xray units as well as modern digital ultrasound machines. We can perform all kinds of x-rays at your yard including neck and back x-rays (e.g "kissing" spines). We can also perform shockwave - a treatment for suspensory ligament injuries, sore backs etc at home.

We have amazing portable video endoscopes and gastroscopes which means we can visit you at home to perform scoping exams in the investigation of coughs, respiratory noise, headshaking, nosebleeds etc.

We offer laser surgery at home for the removal of sarcoids and melanomas.

Our vets have access to our accredited laboratory at our hospital which means your horse or pony's results are available

THE SAME DAY.

This includes
bloods tests,
worm egg counts,
tracheal wash
samples etc.

Laser Surgery

We are pleased to announce that we can now offer laser surgery at Endells. We have been using lasers for airway surgery for several years but we have recently added our own diode laser to our growing list of facilities we can offer our clients.

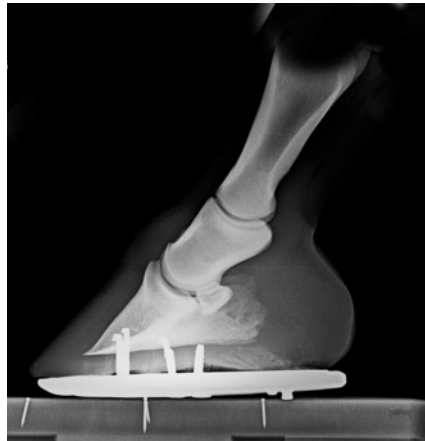

Laser surgery is an effective treatment for many types of sarcoids and melanomas with the majority of horses treated whilst standing under light sedation and local anaesthetic. Many horses can be treated at home. Laser removal of sarcoids has been shown to result in reduced re-growth and spread compared to surgical removal and results in little or no bleeding and swelling. The area usually heals completely within 3 - 6 weeks. If you have any questions regarding laser surgery and sarcoids, please call and ask to speak with Richard or Nigel on 01722 710046

FOOT BALANCE XRAYS

*Does your horse or pony suffer from problem feet?
Chronic low grade lameness? Pottery forelimb action?*

At Endells we are passionate about foot balance as an important factor in preventative health care. Over 70% of forelimb lameness we see is foot related! Foot balance xrays are vital to assess the conformation of a horse and can prevent the development of chronic foot conditions such as corns, heel bruising and sidebone. Remember no foot no horse!

At our Equine Hospital we are offering a set of foot balance x-rays (lateromedial and dorsopalmar view) with a free trot up examination and an emailed copy of your x-rays sent to you or your farrier for a total of £100.

STAFF NEWS

Those of you that visit the hospital regularly will notice that one of our nurses, Lana, is now working in the office. She is primarily answering the telephones and greeting clients at reception. We are pleased to welcome her to our existing busy team.

...

Hani has recently achieved something totally amazing. She completed her first Ironman competition in an outstanding time of 11 hours 36 minutes and 47 seconds. For those of you not sure what an Ironman entails it's a 2.4 mile swim followed by 112 mile bike ride followed by a full marathon. Absolutely incredible I'm sure you'll all agree. Well done Hani we're all very proud if you. She is currently undecided if she's going to do another one!

Special
Offers

Keep your eyes open for some special offers coming your way...

- Castration clinics
- Yard visits
- Village visits
- Loyalty Scheme

**HORSE
DIALOG**

HorseDialog is available exclusively through participating vet practices. HorseDialog gets you closer to your equine vet with practice and health information at your fingertips. HorseDialog makes it easy to manage your horse's health needs, while connecting you directly to your vet practice!

Create a virtual stable on your phone for up to 10 horses. Fill in all the useful information needed to keep track of their health routine including worm control, vaccinations, dentistry and farriery. The app then automatically creates a calendar of events and appointments.

**Download this exciting new app for FREE from the App Store
When prompted for the practice code enter 9b33**
